☐ Contact information verified
☐ Permit made available.
☐ Operating conditions reviewed and discussed with contact.
☐ Photograph equipment
☐ Complete VEE (if applicable)
☐ Housekeeping
☐ Excellent
☐ Average
☐ Poor

Findings

Additional Photos are located at O:\Photos\Enforcement\Special Projects\Paradise Burn Debris Cleanup\05-16-19

- Photo #6350 – Skyway headed north. No trackout issues noted, rain soaked roadways.
- Photos #6351-6359 – Billie Rd. Some recent mud and wood debris tracked onto roadway from work at home site. #6359 depicts vegetative debris burning at the southeast corner of Billie Rd and Clark, which I reported to Town of Paradise Fire.
- Photo #6362-6364 – Timber/tree collection area northeast of Durham Pentz Rd and Clark Rd., minimal trackout on roadway, no dust issues. We have received complaints about dust from this facility. Additional gravel at entrance/exit may help with knocking off mud before trucks re-enter roadway.
- Photos #6365-6370 – Weimer & Sons concrete recycling collection facility in Oroville (formerly Franklin, formerly Granite) at 4714 Pacific Heights Rd – no issues
- Photos #6371-6373 – Odin metal recycling facility east of 7th Avenue and north of Georgia Pacific Way in Oroville - no issues

General assessment:

Rain has mitigated dust issues and washed roadways of the build-up of dirt that I have seen previously. There was minimal work being conducted; the government work was not operational the day of my inspection. I did not see any excavations. I did see mud tracked onto the roadway on side streets by private contractors. One property was observed as burning with no one in attendance and on the east side of Clark Road. I reported to Joe Tapia, CAL Fire Battalion Chief, but he wasn't too concerned. Both Granite/Weimer & Sons concrete facility and Odin metal facility looked fine. No issues.

Concerns/Issues for Follow-up Action:	Continue inspections to identify areas of concern				
Investigated By:	U. Parker	Inspection Date:	5/16/19
